

WHERE DOES IT GO?

Correctly placing your carts ensures snow removal and waste collection can proceed without disruption. Please use this handy guide to help you determine where to place your carts on your collection day.

Scenario #1

If the sidewalk has no curb and there is **NO** snowbank between the sidewalk and the road, the bin should be placed in the driveway or on the property owner side of the sidewalk.

Scenario #2

If there is a sidewalk with a boulevard and there is a snowbank between the sidewalk and road, the bin should be placed in line with the snowbank. Not on the road, not on the sidewalk, not on the property side of the sidewalk.

Scenario #3

If there is a sidewalk with a curb the leads directly to the road, the bin should be placed in the driveway or on the property owner side of the sidewalk. Not on the sidewalk or on the road.
