Fire Department Planning Comments

Date: 2024-08-07

File No.: A7-24

Adequate water for fire suppression:

- May require a water reservoir.
- Existing water may be adequate (pond, stream, water reservoir.)
- Within a hydranted area or close proximity.
- Other/Not Required

Comments: On site water is not required for a barn. There is a stream in close proximity to the property that would be used in the event of a fire.

Suppression equipment considerations:

- Department has all equipment needed to respond.
- Building would require an aerial device to respond.
- Department will need to purchase equipment. Equipment needed: N/A

Other:

- No further comments.
- More information required.

Comments: N/A

Derek Malynyk
